BSc. Software Engineering
Bugema University

2017 – 2019
BA. Interior Design, Architecture
Kyambogo University

Certificates

Responsive Web Design
JavaScript Data Structures & Algorithms
FreeCodeCamp

Profile

A junior full-stack developer with two years of self-teaching. Gained experience in designing and developing functional, scalable, maintainable and user-friendly projects using React, NodeJS, MongoDB, vanilla JavaScript, HTML and CSS. I love solving algorithmic problems using python.

Relevant Experience

Full-stack Developer (Volunteer)

Peacodove Technologies - 2020

Designed the system architecture and collaborated on the implementation of the initial Learning Management website architecture for K-12 students and teachers

Intern

Andela Build for SDG (Cohort 1 & 2) - 2020

Technical Team Lead
Led a 6-member team for 6 weeks while designing an online marketplace app for farmers.

Contributor
Designed wireframes and UI concepts for an online teachers' hub, a resource platform for teachers and students.
Increased scalability and optimized project dependency by integrating ES6 into the front-end codebase of the Teachers Hub project

Projects

Issue Tracker

A Jira-like issue-tracking app built with the GraphQL API, MongoDB, React, Node and Bootstrap.

Yogera

A simple social media application built with React, Node, and MongoDB

Weather

A weather app that fetches real-time weather information from the OpenWeatherAPI.
